## Preface

This Statistical Abstract has been prepared by the Gambia Bureau of Statistics in response to the need for bringing together statistical information relating to various social and economic sectors into one publication for dissemination.

The tables have been compiled partly from statistics collected directly by the Bureau through surveys and censuses and from statistics/administrative records compiled by Ministries, Departments and Agencies (MDAs) and other organizations. The source of the data is shown under each table.

The Bureau appreciates the continued cooperation of all MDAs and other organizations and would like to thank all parties who in one way or the other contributed towards the publication of the Abstract.

I hope this publication will be of use to planners, policy makers, researchers, academicians and all those who need information about The Gambia.
